

ECE 140A Lab 4

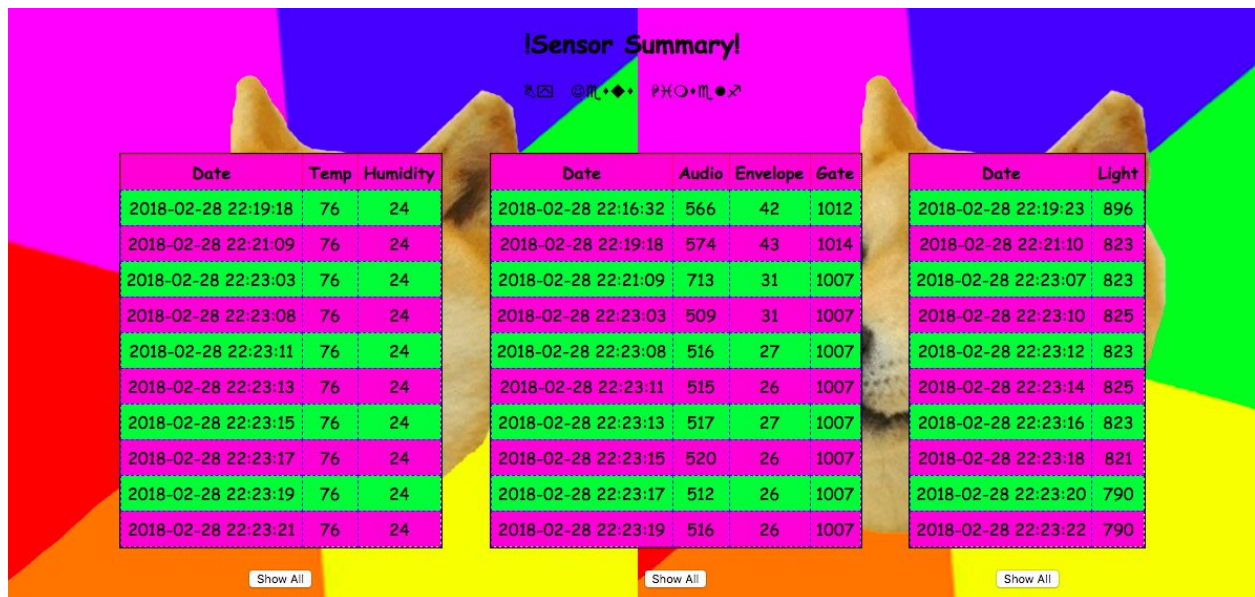

Because we used the default sync folder, we did not add anything for that. However, the config for the default sync folder is included.

```
Vagrant.configure("2") do |config|
```

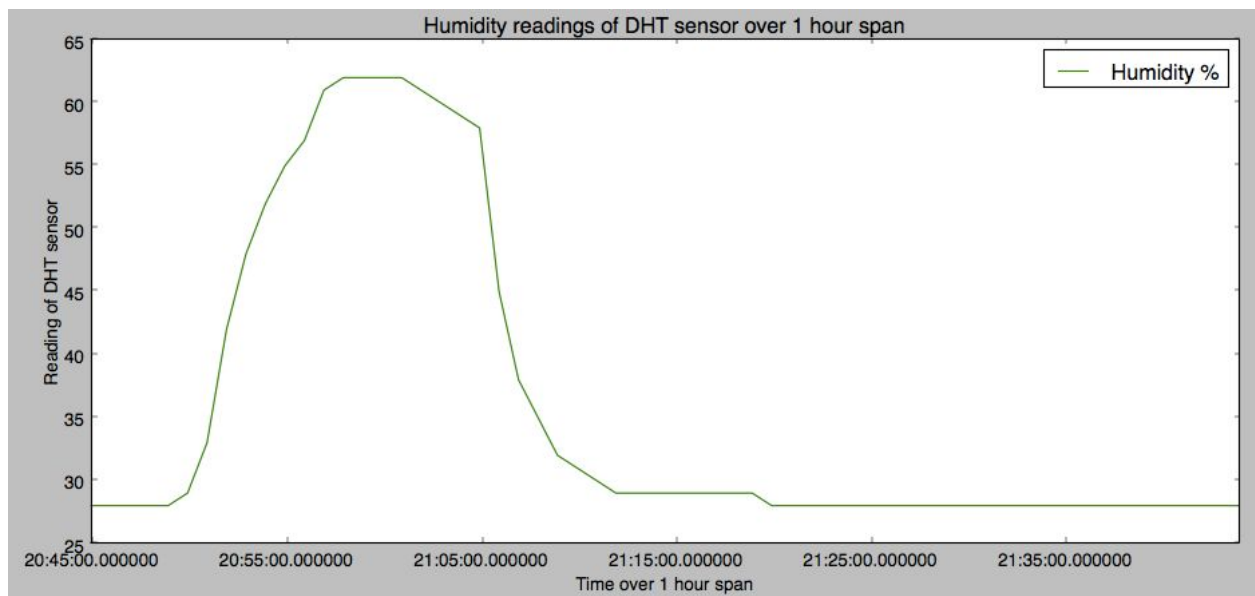

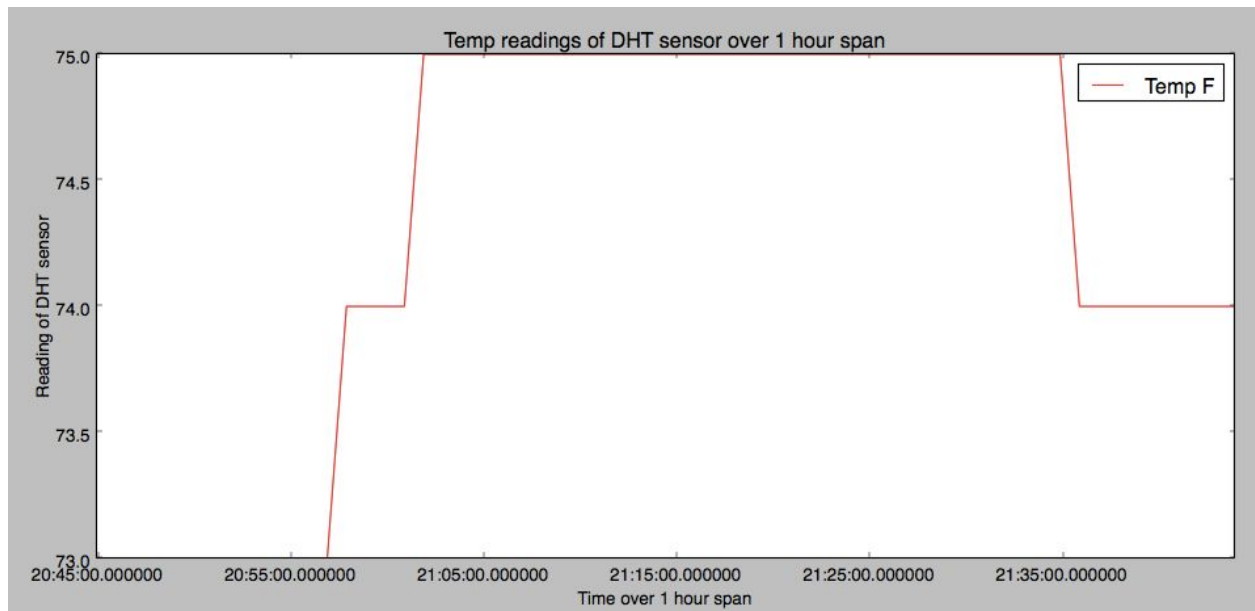

```
config.vm.box = "ubuntu/xenial64"
config.vm.synced_folder "/", "/vagrant"
config.vm.network :forwarded_port, guest:5000, host: 1337
```

End
